CAREER OBJECTIVE

Ambitious and Enthusiastic Professional Seeking a Challenging Position to Leverage Strong Analytical and Problem-Solving Skills in a Collaborative and Dynamic Environment

PROFESSIONAL SUMMARY

- 4 months of hands-on experience as a DevOps Engineer and 6 months as a Software Developer, specializing in CI/CD automation, cloud infrastructure management, and container orchestration.
- Proficient in Jenkins, Docker, Kubernetes, Terraform, AWS, and Prometheus for building efficient, scalable, and automated systems.
- Automated automated deployment processes, improving deployment speed by 30% and reducing errors.
- Designed and implemented scalable microservices using Kubernetes and Docker, achieving a 20% increase in system efficiency.
- Managed in managing cloud resources on AWS, utilizing services such as EC2, S3, IAM, and CloudWatch for robust infrastructure.
- Implemented continuous monitoring with Prometheus and Grafana, proactively identifying and resolving system issues, reducing downtime by 15%.
- Strong communicator with experience working in Agile teams to deliver high-quality, secure, and performance-optimized solutions.
- Developed scalable and efficient software solutions using Spring Boot, React JS, MySQL, and Hibernate.
- Experienced in creating clear documentation for system configurations and troubleshooting.

TECHNICAL SKILLS

- Programming & Scripting: Python, Java (J2EE), C++, JavaScript, Bash
- Back-End Development: Spring Boot, Spring MVC, Hibernate
- Web Technologies: HTML5, CSS3, React JS, Node.js, RESTful APIs,
- CI/CD Tools: Jenkins
- Containerization & Orchestration: Docker, Kubernetes
- Infrastructure as Code (IaC): Terraform
- Configuration Management: Ansible
- Cloud Platforms: AWS (EC2, S3, VPC, IAM, CloudWatch, RDS, Route 53)
- Monitoring Tools: Prometheus, Grafana
- Databases: MySQL, PostgreSQL
- Version Control: Git, GitHub
- Build Tools: Maven
- Networking: TCP/IP, DNS, Load Balancing
- Operating Systems: Windows, Linux

PROFESSIONAL EXPERIENCE

DEVOPS ENGINEER INTERN | StarAgile (Remote) | April 2024 – July 2024

- Automated CI/CD pipelines using Jenkins, enabling seamless build, test, and deployment workflows, cutting deployment time by 30%.
- Orchestrated microservices with Docker and Kubernetes, improving scalability and efficiency by 20%.
- Designed and deployed AWS infrastructure using Terraform, optimizing resource provisioning and ensuring cost-effective management.
- Implemented system monitoring solutions with Prometheus and Grafana, proactively identifying bottlenecks and reducing downtime by 15%.
- Used Ansible for consistent server configuration and rapid recovery, ensuring high availability and performance.
- Collaborated with cross-functional teams to integrate best practices in DevSecOps, improving application security and compliance.

- Developed and deployed web applications using Spring Boot, Hibernate, React JS, and MySQL, streamlining application performance and improving user experience.
- Led the enhancement of UI/UX design, focusing on intuitive interfaces and boosting customer satisfaction.
- Collaborated in Agile teams, ensuring the rapid and successful delivery of high-quality solutions within deadlines.

PROJECTS

FINANCE ME | BANKING MICROSERVICE

- Built and implemented a robust CI/CD pipeline using Jenkins, Docker, Terraform, and AWS, achieving end-to-end automation for deployment and monitoring of a banking microservice.
- Designed and deployed scalable AWS infrastructure, including VPC, subnets, security groups, and load balancers, to ensure high security, availability, and performance of the application.
- Integrated Prometheus and Grafana for real-time monitoring of server health, enabling proactive resolution of potential issues and minimizing downtime by 20%.
- Enhanced operational efficiency by automating infrastructure provisioning and deployment processes, reducing manual intervention by 40%.

PHARMACY MANAGEMENT SYSTEM

- Developed a responsive web application using HTML, CSS, React JS, and MySQL, streamlining the management of pharmacy and doctor information.
- Improved system efficiency by automating data handling, reducing manual errors by 30%, and boosting overall data accuracy and reliability.
- Designed an intuitive user interface to enhance user experience and adoption, resulting in a 25% reduction in training time for new users.

VEHICLE MANAGEMENT SYSTEM

- Designed and deployed a feature-rich web-based application using PHP and MySQL, improving tracking and service management for small businesses.
- Optimized service workflows, reducing service request processing time by 35% through automated data management and streamlined processes.
- Enhanced application scalability and reliability, accommodating up to 50% more concurrent users with efficient database queries and robust backend logic.

EDUCATION

- | | |
|---|------------------------|
| • MASTER'S DEGREE Computer Application University of Madras, Chennai with 78.9% | June 2021 - April 2023 |
| • BACHELOR'S DEGREE Computer Application University of Madras, Chennai with 72.4% | June 2018 - April 2021 |
| • HIGHER SECONDARY CERTIFICATE PCMB GOVT HSS Thokilangadi, Kannur with 61% | June 2016 - March 2018 |
| • SECONDARY SCHOOL CERTIFICATE SSLC Rani Jai Higher Secondary School, Kannur with 62.4% | June 2015 - March 2016 |

CERTIFICATIONS

- | | |
|---|--------------------|
| • Certified DevOps Engineer StarAgile | Issued Aug 2024. |
| • DevOps Fundamentals IBM | Issued May 2024. |
| • Certified Java Programmer Camerinfoorks Pvt Ltd | Issued April 2023. |
